Summary

Full Stack Developer with strong software engineering fundamentals and hands-on experience building scalable, production-ready web applications using the **MERN stack (MongoDB, Express.js, React.js, Node.js)**. Proficient in modern **JavaScript** (ES6+), state management with **Redux Toolkit**, **RESTful API development**, and secure authentication systems. Experienced in designing responsive, user-centric interfaces using **Tailwind CSS** and implementing robust backend architectures with efficient MongoDB database operations.

Skills

Frontend: React, Redux Toolkit, Tailwind CSS, HTML5, CSS3, JavaScript (ES6+)

Backend: Node.js, Express.js, REST APIs, Socket.io

Database: SQL, MongoDB

Cloud and Tools: AWS S3, Git, GitHub, VS Code, Postman, Vite

Education

Bachelor of Engineering in Information Technology

2024

MJCET(Muffakham Jah College of Engineering and Technology), Hyderabad

CGPA: 8.69

Projects

AI Resume Builder

React, Redux Toolkit, Tailwind CSS, Gemini API

- Developed a full-featured resume generator reducing resume creation time significantly.
- Enabled client-side PDF generation using jsPDF and html2canvas, eliminating server dependency and accelerating export speed.
- Managed multi-step form state efficiently using Redux Toolkit.
- Leveraged advanced React optimization techniques (React.memo, lazy loading, useCallback) to enhance rendering efficiency and scalability.

AccioConnect - Social Networking Platform

React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Socket.IO, AWS S3, Tailwind CSS

- Engineered a full-stack social networking platform featuring JWT-based authentication and real-time messaging powered by Socket.IO.
- Developed a responsive interface with Tailwind CSS supporting dark/light themes and AWS S3-based media storage
- Enabled rich post creation with live image uploads and interactive engagement features such as likes and comments
- Architected a real-time notification system to deliver instant updates on user interactions and messages.

Tic Tac Toe Game

HTML, CSS, JavaScript

- Developed an interactive Tic Tac Toe game with dynamic DOM manipulation and efficient game state management.
- Implemented real-time win detection logic using optimized condition checks for all winning combinations.
- Handled player turns, input validation, and game reset functionality with structured JavaScript logic.

Certifications

- Full Stack Web Development (MERN Stack) - AccioJob
